## FULL STACK DEVELOPMENT

I am a passionate full stack developer with expertise in Java and PHP. I build responsive web applications, handling both frontend and backend. I specialize in database integration, performance tuning, and system analysis. I enjoy team collaboration and managing projects from initial concept to final deployment.

## TECHNICAL SKILLS

| | | | |
|---|---|---|---|
| Core Java | JavaScript | MySQL | DSA |
| HTML5 | PHP | ReactJS | Git & GitHub |
| CSS3 | Advanced Java | MongoDB | |

## KEY PROJECTS

**CONTACT MANAGEMENT SYSTEM ( Xampp, Apache)**                    **2023 - 2024**
**Full Stack Developer**

Developed a Contact Management System with Html, Css, Java Scripts, Bootstrap, PHP and MYSQL, focusing on Add New Contacts, View all Contacts, Update Contacts, Delete Contacts, Search Functionality and Basic Styling. It provides basic functionalities for creating, reading, updating and deleting (CRUD) contact record. It focusing on the beginners who learn about web development, specially how to connect a front-end(HTML/CSS) to a back-end(PHP) and interact with a database (MySQL) using the XAMPP server.

**UNIVERSITY MANAGEMENT SYSTEM (Advanced Java)**                    **2024-2024**
**Full Stack Developer**

I built and launched a complete university management system using Servlets and JSP to handle dynamic web pages and user sessions. I focused on streamlining processes like student registration, course management, and faculty details, while also improving the backend logic and integrating databases smoothly. I also worked on strengthening system security to ensure better performance and scalability.

**IEEE ((ICAIHC) CENTURION UNIVERSITY) ( Java Script)**                    **2024-2025**
**Frontend Developer**

The IEEE International Conference on Artificial Intelligence and Human-Centric Computing (ICAIHC) website serves as a hub for information related to the conference , implemented using a Chrome Extension.

– For researchers it provides a platform to submit papers, find conference themes, and access calls for papers.

– Offering easy access to necessary resources and using modern web technologies to ensure a smooth user experience.

– Technology Used: HTML, CSS, JavaScript, Bootstrap.

## EDUCATION

**Bachelor of Technology**

Centurion University of Technology and Management, Bhubaneswar

CGPA - 8.32%                    **2022 - Present**

**Intermediate**
Vikash Higher Secondary School, Bargarh

PERCENTAGE – 68.33%                    **2020 - 2022**

**Matriculation**
Little Angels Public School, Barpali
PERCENTAGE - 67.66%                    **2010 - 2020**

## EXTRACURRICULAR ACTIVITIES

**Problem-Solving Techniques**

Actively enhancing problem-solving skills through Java programming and coding challenges.

**Learning New Techniques**

Continuously learning and experimenting with emerging technologies and development techniques, such as machine learning, web frameworks, and efficient coding practices.
